

Handicare:

Nationwide network of Handicare partners

Handicare works with a national network of trusted partners providing local expertise for thousands of stairlift users. In only a few questions they can identify what stairlift would suit your needs and then recommend the best solution to meet your requirements today and tomorrow.

In order for them to give you an exact cost for the stairlift solution most suitable for your steps, they will need to visit your home to perform a full survey and user assessment. During the survey the advisor will take the time to discuss your individual situation and recommend a stairlift solution.

This is completely free of charge and without any obligation to make your mind up there and then.

To request a free and no obligation home survey and assessment from a Handicare partner, or information on our other products and services, please contact us.
