Otolift

Over the years

Otolift; founded in 1891, have been a manufacturer of stairlifts for more than 45 years. Over the years the once small Otolift factory has now grown into one of the most innovative stairlift suppliers in the world.

As a family company, Otolift offers the care and attention that you don't always get from other companies. That particular piece of additional faith is exactly what you are looking for when purchasing a stairlift.

Family company since 1891

Otolift; founded in 1891, have been a manufacturer of stairlifts for more than 45 years.

160,000 stairlifts

More than 160,000 stairlifts installed worldwide.

Otolift Air

Not just a name,
but also a promise!

More than 160,000 customers have already learned that an Otolift stairlift is much more than a useful tool in everyday life. The Otolift models, the first of which was manufactured in 1968, help people to live their lives the way they are used to: autonomously and independently, with joy and pleasure.

Otolift customers want to live their lives in the place that has been their home for years or even decades. Their own familiar home, being close to friends and welcoming neighbours, the habits and hobbies that make life worthwhile, these are the things that can still be enjoyed, even if mobility is restricted by a staircase.

Purchasing an Otolift stairlift means not only you choose excellent service and high-quality, but moreover you choose the life you wish to live.

Otolift customers acknowledge year after year: Otolift is freedom, freedom they deserve.

Otolift Air

True innovation

After intensive research and extensive material tests, we have developed a rail that is prestigious: the thinnest single rail in the world is now exclusively available for the Otolift Air. The Otolift Air has become the customer's favourite, thanks to its modern design and advanced technology.

The ground-breaking technology ensures you to experience the proven comfort and certified safety. Furthermore, you can enjoy the amazingly subdued elegance. A single slim rail that is guided low alongside the stairs: everything fits harmoniously into your home environment.

Otolift Air

New form of elegance

The Otolift Air; influenced by modern design, not imposing, but respecting the environment in an elegant and modest way.

Taking a closer look at the Otolift Air incites amazement: the unique single rail appears delicate, but can still offer the flexibility and durability offered by other stairlifts on the market. Elegance and technology are a perfect combination within this system. The thinnest single rail in the world is brought to you exclusively by Otolift.

The Otolift Air satisfies, by means of exclusive elegance, an excellent level of comfort and important safety functions.

Otolift Air

Flexible convenience

The Otolift Air lends itself perfectly for installation along the steep, narrow side of your stairs.

Possibly, allowing your hand rail to stay in place and leaving the wide side free to walk up the stairs. The thin Otolift rail, is unobtrusive, therefore making little impact to the space on your staircase.

Steep, narrow or spiral staircases, the Otolift Air easily conforms to the most challenging stairs and follows all curves in an inconspicuous way. In addition, the rail takes up little space, making it possible to still walk up the stairs properly. This way, it is safeguarded that family members or guests can use the stairs safely at all times.

Automatically folding footrest

Equipped with an automatically folding footrest as a standard. This way you do not need to bend down to fold the footrest.

Automated swivel seat

Equipped with an automated swivel seat, for a smooth ride and getting on and off safely. (Optional)

Reverse Drive Technology

Travelling backwards is also an option, providing more seating comfort. Also this prevents you from hitting walls or hand rails with your knees. (Optional)

Otolift Air

The 7 advantages

1. Your hand rail could remain in place
2. Wide side of the stairs remains free
3. Thinnest single rail in the world
4. Super compact seat
5. Automated swivel seat
6. Automatically folding footrest
7. Fixed to the stairs

Otolift Air

The thinnest single rail in the world

Using the Otolift Air you choose an exclusive, prestigious rail system. This stairlift is quite discrete thanks to the unusually small dimensions and tight fit.

Unique!

Thinnest single rail worldwide

Otolift Air

Rail cross-section

This makes it particularly clear: the predecessor (Otolift One) and the new rail system of the **Otolift Air** next to each other.

Otolift One (predecessor)
ø 8 cm in real size

Otolift Air
ø 6 cm in real size

Otolift Air

Reverse Drive Technology

Thanks to this smart technology the lift can travel partly or even entirely backwards. This prevents you from hitting the wall or handrail with your knees.

Otolift Air

Intuitive and easy to use

Your Otolift was designed for convenience.
The use is very intuitive and will soon become
second nature.

Step 1

You move the chair towards you
using the wireless controller.

Step 2

You unfold the chair lightly and easily.

Step 3

You sit down on the
comfortable seat.

Step 4

Operate the control and the chair starts moving quietly and smoothly.

Step 5

The chair quietly continues its way upstairs and stops automatically.

Step 6

The seat turns automatically (depending on model) after which you step off safely.

Otolift Air

Intuitive and easy to use

Safe

The safety belt is easy to use and can be operated with one hand.

Smart

The stairlift keeps functioning in case of power failure.

Intelligent

Your Otolift will stop when detecting an obstacle. Automatic, soft and safe.

User-friendly

The control lever is robust and stable enough to be used as a support.

Space saving

The Otolift can be folded quickly. This saves space and leaves the stairs accessible.

Short start

Because of the short start, the passage or door at the bottom of the stairs remains clear.

Otolift Air

Pick your upholstery and paint colour

The new Otolift Air does not only persuade by its exclusive design, but also because of the options available, that allow an element of personalisation to your lift. The Otolift is available with a seat in your favourite colour for a perfect match with your interior. Also in terms of materials there are various options. You choose and we make it happen.

Otolift

Installation and service

The installation of your stairlift will be carried out by experienced technicians. Flawlessly, cleanly and quickly. After the installation you will receive a calm, clear and extensive explanation. The technician will not leave before every question has been answered and you master the stairlift!

Finished within three hours

An important part of our lifts design was to have the installation carried out as smoothly as possible. Over 160,000 customers will agree that we succeeded in this: Within three hours on average, your inconspicuous Otolift is installed in your stairway.

Your Otolift stairlift is...

- Screwed to the stairs
- Neatly finished within three hours
- Calm, clear and extensive explanation
- Installed entirely by experienced technicians

Extensive explanation

After the installation you will receive calm, clear and extensive explanation. The technicians will not leave until you master the entire equipment!

Screwed to the stairs

Your Otolift will be screwed to the stairs. As such, it is not necessary to drill into your walls or panels. If you would prefer to have the stairlift mounted to the wall due to the staircase material. No problem. We can offer this too.

Otolift

The advantages of Otolift

- ✓ Over 160,000 units sold
- ✓ A reliable familybusiness, since 1891
- ✓ 100% own production
- ✓ A solution for all stairs
- ✓ Value for money
- ✓ High quality and safety
- ✓ Innovative stairlifts
- ✓ Aesthetically pleasing

100% own design

The Otolift Air is designed entirely by us. The rail is installed using the latest software, to fit on your stairs exactly and as inconspicuously as possible.

100% own production

The Otolift Air, seat and rail are produced entirely by us. From bending tubes to cutting and processing parts of the chair. Everything is done in-house.

Arrange an Assessment for an Otolift

We have already provided a lot of information about our unique stairlifts. But what will be the cost of your Otolift?

Unfortunately as every staircase is different, and you have your own preferences and wishes, we cannot give a simple answer to this question without assessing your staircase and individual needs in person.

Free and non-binding staircase evaluation.

Our experienced advisors work all across the country and will be happy to visit you to give personal advice. Of course this is done free of charge and entirely voluntarily. Our adviser will evaluate your staircase and listen well to your individual wishes and preferences. He will give you transparent advice about which Otolift best fits you and along which side of the stairs it could best be installed.

At that moment, for us it is possible to determine the actual price of your Otolift.

Of course we hope that you will consider us when taking your next step: a non-binding staircase assessment!

A reliable family business, since 1891
